

SAFELYNESTED

Charity Facilitator — Daily Tasks

A precise, step-by-step working guide for charity facilitators

Who this is for. Charity Facilitators — the elevated charity-side role responsible for reviewing referrals, approving or rejecting them, and managing the bookings that turn an approved referral into an actual stay for a family. This is not an onboarding guide; it assumes your account already has the Charity Facilitator role and you've logged in. For account setup, see *Onboarding a Charity Facilitator*.

What this document covers. Every task you perform day-to-day, broken into precise steps with the exact URLs, button names, required fields, validations, and what happens behind the scenes — including which emails are sent and which records change. Because real families depend on these workflows being executed correctly, every step in this document has been verified against the application's source code.

About the URLs in this document. Every facilitator URL is scoped to a specific charity via a `{charityId}` path segment — for example, `/charity-facilitator/42/dashboard` for the facilitator dashboard of charity #42. Single-charity facilitators are routed to their own charity automatically after login, so the ID rarely matters. Multi-charity facilitators (users with the **Multi-Charity Facilitator** role) start on a hub at `/multi-facilitator/hub` and pick a charity first — see the *If you facilitate for more than one charity* section below.

If you facilitate for more than one charity

SafelyNested has a separate **Multi-Charity Facilitator** role for people who help several charities. If your account has this role, your experience differs in two specific ways from a single-charity facilitator. Otherwise the rest of this document applies as written.

1. After login you land on a hub, not a dashboard

When you log in, you're routed to `/multi-facilitator/hub` instead of straight to a charity dashboard. The hub shows one card per charity you're authorized to facilitate, with the at-a-glance counts that matter most:

- **Pending Referrals** — families waiting for your approve/reject decision. Cards with any pending referrals are visually flagged in amber to draw your attention.
- **Confirmed Bookings** — reservations ready for arrival.
- **Checked In** — families currently on site at one of that charity's locations.

Click any card to enter that charity's facilitator experience. From that point, every action you take is scoped to that one charity — the URL carries its `charityId`.

2. The "Operating as: *Charity*" banner is your safety net

Once you're inside a charity, every facilitator page shows an amber banner across the top reading **OPERATING AS — *Charity Name* — City, ST**, with a pill button on the right labelled ← **All charities**. The banner is your constant context cue: if you forget which charity you were working in, look up. The link returns you to the hub so you can pick a different one.

Single-charity facilitators see the same banner but without the back-link — it just confirms which charity they're acting on.

Browser-tab safety. Because the charity ID lives in the URL (not in your session), you can safely open two charities in two browser tabs and they won't interfere. Approving a referral in Tab 1 acts on the charity in Tab 1's URL; the same in Tab 2 acts on Tab 2's. Bookmarks work the same way — each one points at a specific charity.

Tasks covered

1. **Open and read your dashboard** — understand the numbers before you act.
2. **Browse referrals** — see all referrals for your charity, optionally filtered by status.
3. **Review a referral's details** — understand who's being referred and why before approving.
4. **Approve a referral** — greenlight a family for housing.
5. **Reject a referral** — with a written reason, sent to the charity partner.
6. **Browse bookings** — the master list of all stays for your charity.
7. **Create a booking from an approved referral** — turn approval into a real stay, optionally funded by a donation.
8. **Check in a guest** — mark arrival when the family shows up.
9. **Check out a guest** — mark departure at the end of the stay.
10. **Cancel a booking** — with a written reason. Releases donation funds and partner availability.
11. **Update a booking's status manually** — for the cases the standard buttons don't cover.

Reference: statuses you'll see

Referral statuses

PENDING awaiting review · **APPROVED** ready for booking · **REJECTED** declined · **COMPLETED** family stayed · **CANCELLED** withdrawn before stay

Booking statuses

PENDING created, not yet confirmed · **CONFIRMED** ready for arrival · **CHECKED IN** family on site · **CHECKED OUT** family has left · **COMPLETED** stay closed · **CANCELLED** · **NO SHOW**

Task 1 — Open and read your dashboard

TASK 1 Read the Facilitator Dashboard

WHEN

Every time you log in — orient yourself before doing anything else.

WHERE

/charity-facilitator/{charityId}/dashboard

The Facilitator Dashboard is the green-themed page you land on after login. It shows the operating health of your charity at a glance: how many referrals are awaiting your review, how many are approved, how many bookings are active, and recent activity.

Steps

- 1 Open `safelynested.com/login` and sign in.
- 2 If you also have the Charity Partner role, you'll land on the purple Charity Partner Dashboard. Click **Facilitator Dashboard** in the sidebar (the green-highlighted item with the shield icon) to switch.
- 3 Read the eight stat cards at the top of the page (described below).
- 4 Scan the **Recent Referrals** and **Recent Bookings** sections for anything new since your last login.

The Charity Facilitator Dashboard.

What the stats mean

Card	Meaning
Pending Referrals	Referrals awaiting your approve/reject decision. Anything here is blocking a family from being booked.
Approved Referrals	Referrals you've approved that have not yet had a booking created.
Rejected Referrals	Referrals you (or another facilitator) declined. Counts cumulatively.
Total Referrals	All-time count for your charity.
Confirmed Bookings	Bookings ready for arrival but the guest hasn't checked in yet.
Checked-In Bookings	Families currently on site. This number drives daily operations.
Completed Bookings	Stays that have ended.
Total Bookings	All-time count.

Tip: If *Pending Referrals* is greater than zero on a given morning, that's the first place to start — every pending referral is a family waiting for an answer.

Task 2 — Browse referrals

TASK 2 Browse the referrals list

WHEN

Reviewing what's pending; finding a specific referral.

WHERE

/charity-facilitator/{charityId}/referrals

The Referrals page lists every referral submitted under your charity, newest first. You can filter by status to focus on what needs attention.

Steps

- 1 From the top navigation, click **Referrals**.
- 2 To filter by status, use the status filter buttons or pass a query parameter (e.g. `?status=PENDING`). The valid values are `PENDING`, `APPROVED`, `REJECTED`, `COMPLETED`, `CANCELLED`.
- 3 Each row shows the participant's name, urgency level, location preference, status, and the date the referral was created. Click any row to open the referral's detail page.

The referrals list with a status filter applied.

Note: Referrals from *other* charities never appear here. The list is automatically scoped to your charity only.

Task 3 — Review a referral's details

TASK 3 Review a referral before deciding

WHEN

Before approving or rejecting any pending referral.

WHERE

/charity-facilitator/{charityId}/referrals/{id}

The Referral Details page is where you read everything the charity partner has captured about the family being referred. **Always read this carefully before approving** — once approved, a booking can be created and a real stay reserved.

What you'll see

- **Participant info** — name, phone, email, household size.
- **Urgency level** — Low, Medium, High, or Critical.
- **Needs description** — the situation in plain language, captured by the charity partner or by the participant via the public invite link.
- **Selected location** — either a charity location (one of yours) or a partner property (e.g. a hotel that has linked to your charity).
- **Referred by** — which charity partner submitted this.
- **Existing booking, if any** — if a booking has already been created from this referral, the page links to it.

Approve Referral

Reject Referral

A pending referral, ready for approve/reject decision.

Privacy reminder: Participant information is sensitive. Don't share screenshots of these pages outside SafelyNested without redacting the names, contact details, and needs description.

Task 4 — Approve a referral

TASK 4 Approve a pending referral

WHEN

The referral is in scope, accurate, and you're ready to fund a stay.

WHERE

Approve button on the referral detail page → modal → `POST /referrals/{id}/approve`

Steps

- 1 Open the referral detail page (Task 3).
- 2 Confirm the status is **PENDING**. The Approve button only appears in this status.
- 3 Click the green **Approve Referral** button at the bottom of the page.
- 4 A modal appears with an optional **Notes** textarea. Use it to record any context for later reference (it's saved on the referral as *facilitator notes*). Notes are optional.
- 5 Click **Confirm Approval**. A loading overlay reads "Approving Referral... Sending approval notification email, please wait."
- 6 You're returned to the referrals list with a green success banner.

PENDING

MEDIUM

Approve Referral

Notes (Optional)

Add any notes about this approval...

Cancel

Confirm Approval

The approval modal. Notes are optional but useful for handoff.

What happens behind the scenes

Change	Detail
Referral status	PENDING → APPROVED
Approved by	Set to your user account.
Approved at	Set to the current timestamp.
Facilitator notes	Saved to the referral if you provided any.
Email notifications	Sent asynchronously to the charity partner who created the referral and to the participant if they have an email on file.

Important: Approving a referral does *not* create a booking. The family doesn't have a confirmed stay until you (or another facilitator) creates a booking from this approved referral — that's Task 7.

Task 5 — Reject a referral

TASK 5

Reject a pending referral with a reason

WHEN

The referral is out of scope, duplicate, or otherwise not appropriate to fund.

WHERE

Reject button on the referral detail page → modal → `POST /referrals/{id}/reject`

Steps

- 1 Open the referral detail page (Task 3).
- 2 Confirm the status is **PENDING**. The Reject button only appears in this status.
- 3 Click the red **Reject Referral** button.
- 4 A modal appears with a required **Reason for Rejection** textarea. Write a clear, respectful explanation. The charity partner will see this verbatim.
- 5 Click **Confirm Rejection**.

Approve Referral

Reject Referral

Reject Referral

Reason for Rejection *

Please provide a reason for rejection...

Cancel

Confirm Rejection

The rejection modal. The reason is required and shown to the charity partner.

What happens behind the scenes

Change	Detail
Referral status	PENDING → REJECTED
Reviewed by / at	Set to your user / current timestamp.
Rejection reason	Saved on the referral, visible to the charity partner.
Email notifications	A rejection notification email is sent asynchronously to the charity partner who created the referral.

Reject reasons are seen by humans. The charity partner reads the reason and may share it with the participant. Be specific, factual, and kind. Avoid blame language. Examples: "Out of catchment area — we serve only Tulsa County"; "Duplicate of referral REF-2026-0123 — please use that one"; "Pending verification of the situation — please resubmit with caseworker contact info."

Task 6 — Browse bookings

TASK 6 Browse the bookings list

WHEN

Tracking what's checked in, what's coming up, what's complete.

WHERE

/charity-facilitator/{charityId}/bookings

This is the master list of every booking ever created for your charity, regardless of who created it.

Optional `?status=` filter accepts: `PENDING` , `CONFIRMED` , `CHECKED_IN` , `CHECKED_OUT` , `CANCELLED` , `NO_SHOW` , `COMPLETED` .

Steps

- 1 Click **Bookings** in the top navigation.
- 2 Each row shows confirmation code, participant name, location, check-in date, check-out date, status, and an action menu.
- 3 Click a row to open the booking detail page (Task 7+).

The bookings list with multiple statuses visible.

Tip:

Filter to **CONFIRMED** to see all upcoming arrivals you'll need to check in soon. Filter to **CHECKED IN** to see who's currently on site.

Task 7 — Create a booking from an approved referral

TASK 7 Create a booking from an approved referral

WHEN

The referral is approved and you're ready to reserve a stay for the family.

WHERE

```
GET /charity-facilitator/{charityId}/bookings/new?referralId=X → POST /charity-facilitator/{charityId}/bookings/new
```

This is the heart of the facilitator's job: turning an approved referral into a real reservation. The booking form is long but most of it is pre-filled or optional. Required fields are marked with *****.

Steps

- 1 From an approved referral's detail page, click **Create Booking**. (You can only create a booking for an **APPROVED** referral — the system will block other statuses.)
- 2 The form opens. The participant's name, email, and phone are pulled automatically from the referral.
- 3 If the participant chose a location via their public invite link, the form will already display a yellow callout reading "Participant's preferred location: {location}" and the location dropdown will be pre-set. **Do not silently change this** — if you must, document why in the Notes field.
- 4 Fill in the required fields: **Location ***, **Check-in Date ***, **Check-out Date ***.
- 5 Optionally fill in time-of-day fields, special instructions, and any notes the location admin will need.
- 6 If a donation is funding this stay, see the *Funding from a donation* section below.
- 7 Click **Create Booking**. The page redirects to the bookings list with a success banner showing the new **confirmation code**.

Preferred Check-out Time

mm/dd/yyyy --:--

The top of the booking form. Required fields are marked with red asterisks.

The location dropdown

Two groups appear:

- **Our Locations** — charity locations belonging to your charity that are marked active.
- **Partner Properties** — properties owned by Location Partners that are linked to your charity. These show alongside city and state for clarity.

You can pick from either group. The form's hidden `locationSelection` field encodes the choice as `charity:{id}` or `partner:{id}`; you don't need to think about that.

Funding from a donation (optional but recommended)

If a verified donation has nights or dollars remaining, you can fund this booking from it. The dropdown lists eligible donations with the donor name, original net amount, and remaining balance.

- 1 In the **Fund from a Donation** card, choose a donation from the dropdown.
- 2 The form auto-fills payment status to **Program Funded**, payment method to **PROGRAM_FUNDED**, and "Paid by" to the donor's display name.
- 3 Make sure the booking **Cost** field is set — it will be debited from the donation's remaining balance. If cost exceeds the remaining balance, the form will reject the submission with an

error.

Fund from Donation (Optional)

Select a verified donation to fund this booking. Payment fields will be auto-filled.

Instructions & Notes

Selecting a donation auto-fills the payment fields.

What happens behind the scenes on submit

Change	Detail
Booking record	Created in PENDING status (or whatever you selected).
Confirmation code	Generated automatically. Format: looks like SN-XXXXXXX .
Participant snapshot	Name, email, phone copied from the referral onto the booking (so historical records survive even if the referral is later edited).
Partner property availability	For partner-property bookings: the matching availability window is consumed (split into BOOKED and surrounding AVAILABLE pieces).
Donation status	If donation-funded: donation moves VERIFIED → <i>Allocated</i> .
Booking confirmation email	Sent automatically to the participant if they have an email on file. Failure to send won't break the booking.

Validation errors you might hit:

- *"Can only create bookings for approved referrals"* — the referral isn't approved.
- *"Check-out date must be after check-in date"* — dates inverted.
- *"Booking must be for at least 1 night"* — same day check-in/check-out is not allowed.
- *"Your charity is not linked to that partner property"* — you picked a partner location your charity isn't authorized for.
- *"That partner property is not active"* — the partner deactivated it.
- *"Not enough donation funds available..."* — the booking cost exceeds the donation's remaining balance.

Task 8 — Check in a guest

TASK 8

Mark a guest as checked in

WHEN

The family has arrived at the location.

WHERE

Booking detail page → **Check In** button

Steps

- 1 Open the booking from the bookings list.
- 2 Confirm the status is **CONFIRMED** or **PENDING**. The Check In button only appears in those statuses.
- 3 Click the green **Check In** button.
- 4 A modal appears with an optional **Check-in Notes** textarea. Use it for things like "arrived 7:30pm with all 3 children, no luggage".
- 5 Click **Confirm Check-in**.

Check-in modal. Notes are optional but recommended for the handoff record.

What happens behind the scenes

Change	Detail
Booking status	→ CHECKED IN
Actual check-in timestamp	Set to the moment you clicked Confirm.
Admin notes	Your notes are appended with a timestamp prefix.

Task 9 — Check out a guest

TASK 9

Mark a guest as checked out

WHEN

The family has left the location at the end of their stay.

WHERE

Booking detail page → **Check Out** button

Steps

- 1 Open the booking detail page.
- 2 Confirm the status is **CHECKED IN**. The Check Out button only appears in this status.
- 3 Click the blue **Check Out** button.
- 4 A modal appears with an optional **Check-out Notes** textarea (e.g. "Property left clean, no damage").
- 5 Click **Confirm Check-out**.

Check-out modal.

What happens behind the scenes

Change	Detail
Booking status	→ CHECKED OUT
Actual check-out timestamp	Set to the moment you clicked Confirm.
Admin notes	Your notes are appended with a timestamp prefix.

Note: "Checked Out" is distinct from "Completed". Use Task 11 (Update Status) to mark a stay as fully completed once any post-stay paperwork is wrapped up, or leave it as Checked Out if completion isn't meaningful in your charity's process.

Task 10 — Cancel a booking

TASK 10 Cancel a booking with a reason

WHEN

The family won't stay (couldn't make it, found other housing, situation changed).

WHERE

Booking detail page → **Cancel Booking** button

Steps

- 1 Open the booking detail page.
- 2 Confirm the booking is not already **CANCELLED** or **COMPLETED** — the Cancel button is hidden in those states.
- 3 Click the red **Cancel Booking** button.
- 4 A modal appears with a **required** reason textarea. Enter a clear, factual reason.
- 5 Click **Confirm Cancellation**.

Cancel Booking modal. Reason is required.

What happens behind the scenes

Change	Detail
Booking status	→ CANCELLED
Admin notes	Your reason is appended with a "CANCELLED -" prefix and timestamp.
Partner property availability	If the booking was at a partner property: the BOOKED window is restored to AVAILABLE , and other charities may now book those dates.
Donation funds	If donation-funded: the donation's status is recalculated and may revert from <i>Allocated</i> back to VERIFIED if no other booking is consuming it. The funds are now available again for future bookings.

Cancellations are not silent. If you're cancelling on behalf of a partner property or because of a donor-funded change, please tell the affected parties. The system handles the data side automatically; the human side is on you.

Task 11 — Update a booking's status manually

TASK 11 Update booking status (catch-all)

WHEN

You need to set a status that the dedicated buttons don't cover — e.g. *No Show*, *Completed*, or correcting a wrong status.

WHERE

Booking detail page → **Update Status** button

Steps

- 1 Open the booking detail page.
- 2 Click **Update Status**.
- 3 Pick a status from the dropdown. Available values: `PENDING` , `CONFIRMED` , `CHECKED_IN` , `CHECKED_OUT` , `CANCELLED` , `NO_SHOW` , `COMPLETED` .
- 4 Optionally add **Completion Notes**.
- 5 Click **Update Status**.

Update Booking Status

New Status *

Select status

Select status

Pending

Confirmed

Checked In

Checked Out

Completed

No Show

Cancelled

The catch-all Update Status modal.

Important: This action does *not* trigger side effects like releasing partner availability or recalculating donations. If you intend to cancel a booking, use Task 10 (Cancel Booking) — not this generic update — otherwise donation funds and partner availability will not be released. Use Update Status only for non-cancellation transitions.

Common errors and what they mean

Error message	What to do
"Referral not found or access denied."	The referral belongs to a different charity than yours, or its ID is wrong. Go back to the Referrals list.
"Only pending referrals can be approved/rejected"	Someone has already actioned this referral. Refresh the page to see the current status.
"Rejection reason is required"	You submitted the reject modal with an empty reason. Fill it in.
"Cancellation reason is required"	Same idea for cancelling a booking.
"Can only create bookings for approved referrals"	The referral hasn't been approved (or was already cancelled). Approve it first.
"Booking not found or access denied."	Cross-charity access attempt. Return to your bookings list.

Help and escalation

If a workflow gets stuck and a family is depending on it — for instance, a booking can't be created tonight and the family needs to be housed — do **not** work around the system by recording bookings outside SafelyNested. Instead, contact your SafelyNested administrator immediately and describe what you're trying to do, the error you're seeing, and the urgency. Edge cases (an admin needs to fix a stuck status, an emergency override) belong with the admin, not in shadow records.
